

KJ High School Festival

Every June offers a chance for the high schoolers to showcase their talent either via the stage performances or their creative classroom displays.

They're responsible for planning and implementing their choice of theme and it never disappoints. From beautiful fantasy landscapes to absolutely scary themes. Their imaginations come alive.

This is also the last festival for the 3rd Graders to celebrate with their fellow classmates before they hunker down for studies. Good luck everyone!

The food and festivities are really quite unique to Japan. I can't wait for next year's festival!
